The US Committee for Graduate Medical Education Urgent Care Medicine is currently soliciting additional program sites for the Urgent Care Medicine (UCM) residency and training programs. As we develop our program, we will be looking for additional sites to fill gaps in geographic regions and program sizes.

To be eligible for the first and second phases of the roll out of the UCM residency program, your institution will need the following:

1) Residency slots available to move to the UCM residency; either below- or above-cap is acceptable as long as they are funded. The residency program requirements will be provided upon receipt of a letter of inquiry (see below).

2) Fellowship programs need to have a dedicated faculty member well versed in UCM and preferably an ABUCM Diplomate.

3) Your institution will need to be an approved American College of Graduate Medical Education (ACGME) site with the following programs:
   a. Emergency Medicine
   b. Family Medicine
   c. Pediatrics
   d. Access to Radiology
   e. Access to Psychiatry
   f. Access to Surgery
   g. Access to Internal Medicine Specialties

4) Your interest to start in the 2020 or the 2021 class.

Please submit a letter of inquiry to the GME Committee for formal interaction and a complete list of the UCM residency program requirements. Send letters of inquiry to:
US Committee for Graduate Medical Education
Urgent Care Medicine
2813 S. Hiawassee Rd., Suite 206
Orlando, FL 32835

If your institution would like to support or join our guidance groups please let us know in your inquiry letter. We encourage input from industry, teaching institutions and physicians.
